PROFESSIONAL SUMMARY

MERN Stack Developer (MCA, 2025) with an Apr–Jul 2026 internship building a multi-tenant recruitment platform: 8-stage candidate pipeline, bulk .xlsx/.csv import with duplicate detection, and Groq/Gemini AI candidate matching. Builds full-stack applications in React.js, Node.js, Express.js, and MongoDB with JWT authentication, RBAC, and Socket.io real-time features in an agile environment.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend:	React.js, Redux, Vite, Zustand, Tailwind CSS, DaisyUI, Bootstrap 5
Backend:	Node.js, Express.js, REST API, MVC Architecture, Socket.io, JWT, bcrypt
Database:	MongoDB, Mongoose, MySQL
Integrations:	Groq API, Gemini API, SheetJS, Brevo, Cloudinary
Tools & Concepts:	Git, GitHub, Postman, RBAC, Multi-Tenancy, Agile/Scrum

INTERNSHIP EXPERIENCE

MERN Stack Developer Intern
Arah Infotech Pvt. Ltd. — Hyderabad, Telangana **Apr 2026 – Jul 2026**

Candidate Management System (CMS) — Multi-Tenant Recruitment Platform
React.js | Node.js | Express.js | MongoDB | Socket.io | Tailwind CSS | Groq API | Gemini API | Brevo | SheetJS | JWT

- Developed a multi-tenant recruitment platform managing 500+ candidate records with an 8-stage pipeline, advanced search, and filtering, reducing candidate-finding time by 85%.
- Built bulk candidate import from scratch, processing 350+ records with .xlsx/.csv column mapping and duplicate detection for 100+ records.
- Integrated Groq API for automated ATS scoring and Gemini API for AI-powered candidate-job matching with retry logic, improving AI processing by 55% and supporting 100 resumes/day.
- Built REST APIs with role-based tenant security (RBAC) and real-time chat via Socket.io.
- Optimized performance, reducing page load time by 50% and API response time from 2s to 800ms (60%).

HRMS — HR Management System
React.js | Node.js | Express.js | MongoDB | Socket.io | Tailwind CSS

- Implemented real-time notifications using Socket.io and resolved state synchronization issues.
- Built OTP-based password recovery, attendance correction, and late-in-time request workflows.
- Refactored admin and employee panels for full mobile responsiveness.
- Fixed critical UTC–IST timezone and schema validation bugs.

PERSONAL PROJECTS

Draft Chat — Real-Time Chat Application **May 2026**
React.js | Node.js | Express.js | MongoDB | Socket.io | Zustand | JWT | Cloudinary | Tailwind CSS | DaisyUI

- Built a real-time one-to-one chat application with Socket.io, online user tracking, and persistent message history.
- Implemented JWT authentication, bcrypt password hashing, protected routes, and tab-isolated sessions.
- Managed state with Zustand and handled profile media uploads via Cloudinary.

Live: https://draft-chat.netlify.app/

EzzyShop — E-Commerce Application **July 2026**
React.js | Node.js | Express.js | MongoDB | Mongoose | JWT | Zustand | Tailwind CSS | Axios

- Built a full-stack MERN e-commerce application with REST APIs, JWT authentication, user/admin role-based authorization, and an admin panel for categories, products, and orders.
- Implemented product browsing, cart management, and COD checkout with backend-controlled pricing and stock validation.
